

AMT REALLYCOOLTOYS.COM

The 4m/4.5m indoor RC Blimp is our most popular indoor model. Due to its size, the augmented helium volume (5.5 m3) enables all kinds of additional payload considerations. Also the design is now more "Zeppelin" like, with huge "display" sides allowing direct application of Logos for branding or use of 2.5m changeable banners (quoted separately). With flight duration lasting over an hour, the 4m RC Blimp is an ideal choice for unmanned piloted or autonomous scientific use, school projects, events, exhibits, and much more.

Specifications: Polyurethane envelope, 2 main motor and 1 left/right back motor, all electronics, fiberglass cabin, simple 3 or 4 channels RC, filling hose 5 ft (1.5m) special adapter to the envelope valve, 2500 mAh Lithium-Polymer battery, 17 ft tether line Ready to go except for the Helium

Manufacturer reserves the right to alter, modify, and update components without prior notice, in an effort to deliver the latest improvements possible. The 4m RC Blimps have important safety design features, protected propeller housings, high quality envelope that can stand much higher internal pressure than needed, extremely low helium permeability and other related properties.

Delivered Ready to fly - Everything included except helium. Just inflate the envelope and Fly!
If you are not sure what RC Blimp to choose, please [contact us](#) so we can help determine what works best for you.

Add-on options available separately:

- Internal RGB Light with light generator and IR controller
- Dropping mechanism (with 4 Channel RC upgrade)
- Art Work (Logo) Print on envelope
