The 6m RC Blimp is an outdoor RC Blimp specially designed to handle payload of up to 2kg (4.4lbs), capable of lifting most 3D gyro stabilized camera rigs and HD cameras available today, with enough emergency power to penetrate wind gusts up to 15km/h (9.3mph), allowing flight in wind speeds up to 10 km/h. Recommended flight conditions are early in the morning and later in the afternoon. Flying the 6m RC Blimp in any condition beyond calm weather is only possible once pilot proficiency is achieved.

This 6m RC Blimp is a great choice for university, government, and corporate use where stable outdoor flight, significant payload capacity, large advertising print surface, with economical helium fill value, where standard larger helium container is enough to fill it and still have enough helium for occasional refill.

**Specifications:** Polyurethane envelope, 1 main vectored motor or classic with 2 vectored motors, and 1 left/right back motor, all electronics, aluminum/carbon motor mount, simple Futaba, Graupner or Spektrum 10 channels RC, filling hose 5 ft (1.5m) special adapter to the envelope valve, 6000 – 8000 mAh Lithium-Polymer battery for the main motor and 3000 – 5000 mAh for the system and back reverse motor, 17 ft tether line Ready to go except for the Helium!

Manufacturer reserves the right to alter, modify, and update components without prior notice, in an effort to deliver the latest improvements possible. The 6m RC Blimp comprises of important safety features, protected propeller housings, high quality envelope material and design to withstand much higher internal pressure than needed, extremely low helium permeability, RC Safety valve, RC Safety bobbin, and other related properties.

Delivered Ready to fly - Everything included except helium. Just inflate the envelope and Fly!  
If you are not sure what RC Blimp to choose, please [contact us](#) so we can help determine what works best for you.

Add-on options available separately:

- Internal RGB Light with light generator and IR controller
- Dropping mechanism
- Art Work Airbrush Print on both sides of the envelope
