The 7m RC Blimp is an ideal outdoor advertising and remote sensing carrier. With an envelope volume of 14m<sup>3</sup>, it is powerful enough to lift up to 2.5kg of payload, including the latest "rail system" where you can move the motor mount as well as the payload (camera rig) to assure perfect GC placement for optimum maneuverability.

Flight duration is around 60+ minutes on a fully charged battery or more depending on conditions and use. Unlike multi-rotor drones, hovering is an inherent feature with blimps, where flight duration is significantly increased using secondary battery power as payload. This feature allows for extended flight duration during banner advertisement use. The 7m RC Blimp is an ideal platform for professional videography, making it a favorite amongst professional videographers, Universities, and variety of agencies and companies requiring extensive remote sensing equipment payload capacity. The 7m RC Blimp is an ideal platform for banner advertisement because of its sheer size allowing large banner print surface.

The 7m RC Blimp, combined with experienced RC pilot, will accomplish almost every expected task.

Specifications: Polyurethane envelope, 1 main vectored motor or classic with 2 vectored motors, and 1 left/right back motor, all electronics, aluminum/carbon motor mount, Futaba, Graupner or Spectrum 10 channels RC, filling hose 5 ft (1.5m) special adapter to the envelope valve, 4.000 to 10.000 mAh Lithium-Polymer battery for the main motor and 3.000 to 5.000 mAh for the system and back reverse motor, 17 ft tether line. Ready to go except for the Helium!

Manufacturer reserves the right to alter, modify, and update components without prior notice, in an effort to deliver the latest improvements possible. The 7m RC Blimp comprises of important safety features, protected propeller housings, high quality envelope material and design to withstand much higher internal pressure than needed, extremely low helium permeability, RC Safety valve, RC Safety bobbin, and other related properties.

Delivered Ready to fly - Everything included except helium. Just inflate the envelope and Fly!  
If you are not sure what RC Blimp to choose, please [contact us](#) so we can help determine what works best for you.

Add-on options available separately:

- Internal RGB Light with light generator and IR controller
- Dropping mechanism
- Art Work Airbrush Print on both sides of the envelope
